CONVERSION FUNNEL

Optimizing the user journey in under three *days*.

A developer spent months building features while ignoring the onboarding flow.

They had thousands of downloads but only a single paying user. The bottleneck wasn't utility — it was friction.

SWIPE →

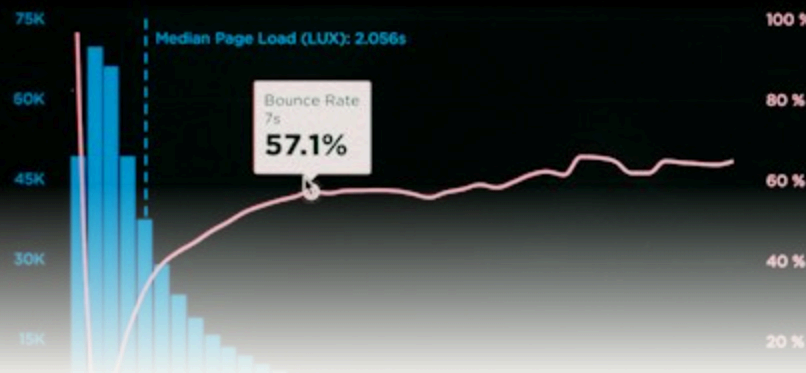

90%  **USERS**
LOST

**Traditional onboarding was
leaking users at every *step*.**

Requiring sign-ups and credit cards before showing any value caused ninety percent of users to close the app immediately.

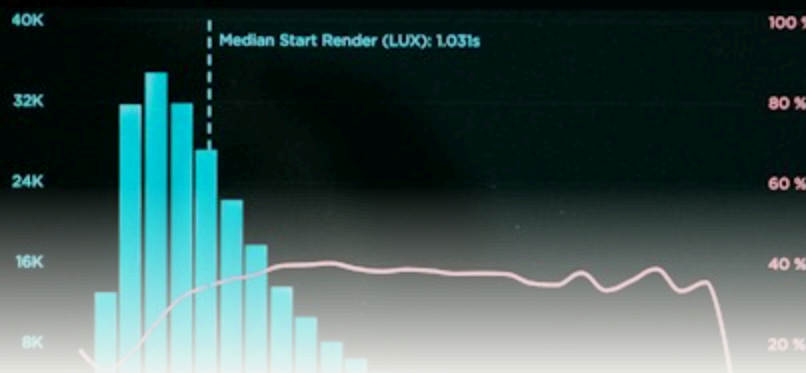

LOAD TIME VS BOUNCE RATE

OPTIONS

EMOTIONAL VALUE

Showing immediate utility before presenting the *paywall*.

They moved the sign-up prompt to after the first action.

Users got to try the tool's core feature first. The paywall was only shown when they wanted to save their work.

SWIPE →

5x  MRR
JUMP

**Revenue jumped to three
hundred dollars in *seven days.***

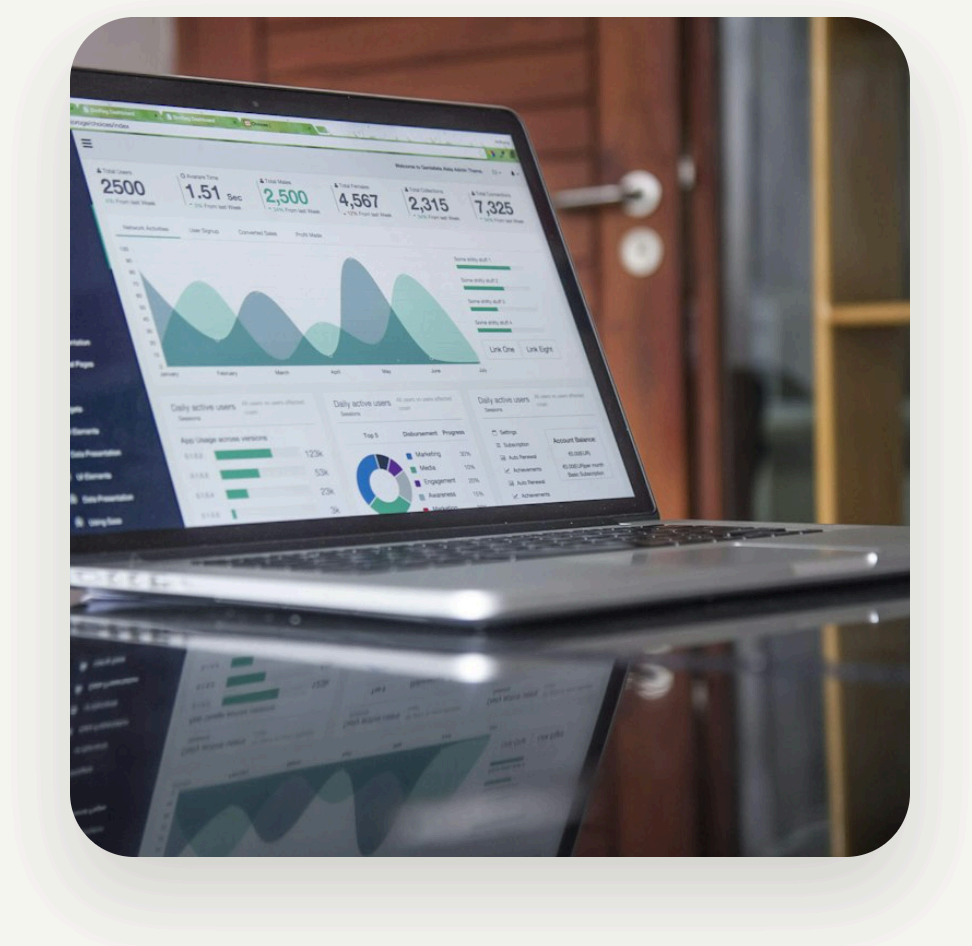

The conversion rate rose from under one percent to five percent, converting passive sign-ups into recurring buyers.

Conversion is won at the first few minutes of *interaction.*

Simplify the entry. Delay the payment.

A product that is easy to try is easy to buy. Stop building features and start removing onboarding friction.

SWIPE →

Fix your onboarding. Multiply your *conversions*.

Complexity won't save a product if users get stuck at the front door. Focus on user flow first.
